## SUMMARY

Open to full-time and contract opportunities within cyber security, with a strong focus on career progression and advancing into more senior technical roles.

## PROFESSIONAL EXPERIENCE

### Security Analyst - CyberCX

Jan 2023 - Present

- Threat detection and incident response activities across enterprises
- Conducted security investigations using SIEM platforms (e.g., Sentinel, Splunk) to analyze logs, identify attack patterns.
- Performed threat hunting operations leveraging MITRE ATT&CK framework to proactively identify adversary tactics and techniques.
- Developed and tuned detection rules, correlation searches, and automated response playbooks to improve SOC efficiency.
- Delivered incident reports and executive briefings outlining root cause, impact assessment, and IOCs as well as recommendations.
- Conducted digital forensics analysis on endpoints and servers.
- Supported security architecture reviews and provided risk-based recommendations aligned with ISO 27001, NIST, and Essential Eight.

### Cyber Security Specialist - Australian Defence Force

Jan 2024 - Jan 2023

- Performed Level 2 SOC duties, including monitoring and triaging security events using a Splunk SIEM.
- Conducted threat hunting and analysis using EDR tooling (SentinelOne) to identify indicators of compromise (IOCs).
- Performed DFIR activities aligned with the MITRE ATT&CK framework, supporting incident investigation and response through forensic analysis using The Sleuth Kit.
- Produced structured incident reports with actionable remediation and risk-mitigation recommendations.
- Developed automation scripts for common SIEM events
- Created, maintained, and appended playbooks and SOPs to standardise response actions.

### Freelance developer - 5 years

Jan 2020 - Present

- specializing in building web applications and software solutions. I deliver responsive, secure, and scalable systems tailored to client needs, working within agile frameworks to consistently meet performance targets and KPIs.

### ICT Field Technician - Australian Defence Force

Jan 2021 - Jan 2024

- Created local Microsoft domain environment and services such as Active Directory and email.
- Ensured minimal downtime and smooth team communication, requiring practical networking knowledge for quick issue resolution.
- Trained staff to handle basic tech challenges independently.
- Work independently and manage a small team.

- Provide ICT support to staff.
- Perform system administration to windows environment
- Work in a team environment.

**Junior Security Engineer - 2 years****Jan 2019 - Jan 2021**

Provided ICT support to staff, help build and maintain an ELK Stack based security operations environment. Supported security monitoring and incident response, while ensuring processes aligned with ISO 27001 requirements and essential 8

**EDUCATION**

- Diploma Of Blockchain Technology
- Cert 4 Cyber Security
- Cert 3 in ICT
- Cert 4 Training and assessment
- Advanced diploma of engineering (mechanical)
- Bachelor of Cyber Security

**CERTIFICATIONS**

- CompTIA +
- Security +
- CCNA
- JCE and JIA
- OSCP
- CWSP
- SOC Level 1 & 2
- PCPP
- Azure Developer Associate (AZ-204)

**SKILLS AND ABILITIES****Security analyst**

- SIEM - Splunk, ELK Stack
- EDR - SentinelOne
- Threat hunting
- Incident Triage
- Report writing

**System admin**

- Ticketing systems
- Remote Desktop support
- Technical Issue Resolution
- Advanced Linux
- Advanced Windows

**Network Engineering**

- Active Directory
- MS Exchange
- MS SQL Server
- Cisco
- MS Sever 2019
- IDS, IPS
- Network segmentation

**Software Development**

- Python
- c++
- Java
- Docker
- GitHub

**Full-stack Web Development**

- PHP
- React
- HTML CSS JS
- Mysql
- cPanel Hosting

**Digital forensics**

- Sluth kit
- Velociraptor
- Cellebrite
- FTK imager
- Wireshark
- Log analysis

**Compliance**

- ISM controls
- Essential 8
- ISO 27001
